-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a gang saw box, classified in class 144, subclass 237.
- II. Claim 9, drawn to method of operating a gang saw box, classified in class 144, subclass 363.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups II and Group I are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus and is not limited to the apparatus as set forth in the invention of Group I. For example, the process as claimed can use a measurement system for detecting upstream, further, the process as claimed can be practiced utilizing side and radially extending cutting edges. Rendering the inventions of Groups I and II separable and distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different search requirements (i.e., the search required for the invention of Group I is not the same as that required for the invention of Group II) and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3725

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
